## Introduction

The Census Bureau has reviewed the RHFS 2024 Microdata file for unauthorized disclosure of the confidential information and has approved the disclosure avoidance practices applied (Approval ID: CBDRB-FY23-104). This codebook was developed by the U.S. Department of Housing and Urban Development and the U.S. Census Bureau.

### Data Structure

RHFS data is provided in three files:

- Properties – records with ‘complete interviews’ (6424 cases).
- IUFMaster – contains administrative, geography, and sampling data (6424 cases).
- Catvar – contains descriptions of the categorical variables.

The "Availability" designation indicates that the variable is on the IUF only, the PUF only, or both the PUF and IUF.

### Sample size

The 2024 RHFS national sample included 11,500 cases. Data were collected at the property level. Therefore, each record in the data set pertains to a property.

### Additional Data Notes

-Number of units in property: The recode for NUMUNITS\_R (number of units in property) is based on the units in questions DP\_6 and DP\_7. The questionnaire also asks for unit counts in questions 5 and 6. For various reasons, the unit counts in these questions may vary. Census Bureau analysts recommend that questions DP\_6 and DP\_7 are likely to be the most reliable sources for total units in property.

## How To Use the Codebook

RHFS variables are divided into eight modules based on subject matter. The table of contents lists the eight modules and the page numbers on which they start. Each module section of the codebook includes an alphabetic listing of variables.

Each variable listing contains the following information:

Name of variable

Description of variable

Response categories (if applicable)

Type: Either continuous or categorical

Length: Length of variable

Questionnaire number: The questionnaire number from which the variable was derived (if applicable)

Question wording: The text of the question (if applicable)

Universe: The records for which this variable applies

Edit flag: A flag to indicate if the variable is edited

Topcoded: A flag to indicate if the variable is topcoded

Bottomcoded: A flag to indicate if the variable is bottomcoded

Recoded variable: A flag to indicate if the variable is recoded

Recode specification: Description of how variable was recoded (if applicable)

Availability: Indicates if the variable is available on the Public Use File, Internal Use File, or both

Comments: Other information helpful for understanding or using the variable

# Administrative Module

The Administrative Modules includes variables that are related to the administration of the RHFS. Most of the variables in this module are created by database managers.

All properties in scope where INTTYPE eq 1 and  
DEBTNUM ge 2

Edit flag variable: JRMORT2

Bottomcoded: No

Topcoded: No

Recode Specifications:

N/A

Availability: IUF Only

Comments:

**YRMORT3 =**

Year debt placed/assumed – 3rd debt

1960 – 2024

Type: Continuous

Length: 4

Questionnaire Number: 27a\_3

Universe:

All properties in scope where INTTYPE eq 1 and  
DEBTNUM ge 3

Edit flag variable: JRMORT3

# Sample Design Module

The Sample Design Module include variables related to the original design of the sample, including the stratum or strata of the property.

| Var Name   | Var Name                                                    | PUF/IUF Availability | Table                    |
|------------|-------------------------------------------------------------|----------------------|--------------------------|
| SAMPSTRATA | Strata of BSA originally selected for sample                | PUF and IUF          | PROPERTIES,<br>IUFMASTER |
| BUILDSTRAT | Building Stratification                                     | IUF Only             | IUFMASTER                |
| PRBPSU     | Prob. of selection of strata within a Primary Sampling Unit | IUF Only             | IUFMASTER                |
| PRBSTRATA  | Probability of selection of unit within strata              | IUF Only             | IUFMASTER                |

**SAMPSTRATA =**

Strata of BSA originally selected for sample

00 = 1 unit

01 = 2 to 4 units

02 = 5 to 24 units

03 = 25 to 49 units

04 = 50 or more units

Type: Categorical

Length: 4

Questionnaire Number:

Universe:

All properties in sample

Edit flag variable: None

Bottomcoded: No

Topcoded: No

Recode Specifications:

N/A

Availability: PUF and IUF

Comments:

**BUILDSTRAT =**

Building Stratification

00 = 1 unit

01 = 2 to 4 units

02 = 5 to 24 units

03 = 25 to 49 units

04 = 50+ units

Type: Categorical

Length: 1

Questionnaire Number:

Universe:

All properties in sample

Edit flag variable: None

Bottomcoded: No

Topcoded: No

Recode Specifications:

N/A

Availability: IUF Only

Comments:

**PRBPSU =**

Prob. of selection of strata within a Primary Sampling Unit

0 – 99999997

Type: Continuous

Length: 8

Questionnaire Number:

Universe:

All properties in sample

Edit flag variable: None

Bottomcoded: No

Topcoded: No

Recode Specifications:

N/A

Availability: IUF Only

Comments:

**PRBSTRATA =**

Probability of selection of unit within strata

0 – 99999997

Type: Continuous

Length: 8
