

COMPANY OVERVIEW

Handoff

Handoff takes responsibility for a residential move-out: the unit ready for the next tenant, and the departing tenant's account settled.

For property managers, investors and design partners · September 2026

PROBLEM

A move-out is two jobs, and the manager runs both by phone and email.

THE TURN

Get the unit ready

- Walk-through and scope of work.
- Quotes from each trade, in order.
- Owner approval of the budget.
- Vendor visits, reports and invoices.
- Paying vendors from owner funds.

THE ACCOUNT

Settle with the departing tenant

- The deposit and any interest owed.
- Charges and credits, each with evidence.
- An itemized statement within 14 days.**
- A refund, or a balance to collect.

At one 300-unit property in an NAA case study, staff spent up to 15 hours a week managing contractors by email, text and phone.

WHO FEELS IT

Third-party managers of small buildings and scattered homes feel it most.

THE CUSTOMER

Manages NYC walk-ups, small multifamily buildings and scattered single-family homes for owners.

No on-site staff. Vendors, phone and email do the work.

WHO SIGNS, WHO USES

The operations lead or the owner signs.

The property manager and the super use it every day.

WHO PAYS

The owner funds the turn. 84% of owners want to approve large repairs.

A manager keeps about \$9 a unit a month, so the owner pays, or recovered charges do.

“It's all happening in spreadsheets and texts outside the platform.” A manager of about 100 units, May 2026

SOLUTION

■ Runs today

□ Delivered in the pilot

■ Manager decision

Handoff runs the move-out. The manager approves the plan and accepts the account.

THE UNIT READY FOR THE NEXT TENANT

THE DEPARTING TENANT'S ACCOUNT SETTLED

| The turn produces the evidence behind each charge on the account.

WHY THE SETTLEMENT MATTERS

In New York, a statement sent one day late forfeits the deposit.

14

days after the tenant vacates to send an itemized statement and return the rest.

Forfeiture. Miss the deadline and the landlord loses any right to keep the deposit. Intent does not matter.

Penalty. A willful violation adds damages of up to twice the deposit.

Burden. The landlord must prove each charge is reasonable. Nothing noted at move-in can be charged.

Late recovery. Collection agencies recover 15–20% of former-tenant debt.

HOW IT WORKS

Code sets every date and amount. A narrow judgment model answers the judgment questions.

Code

Deadlines, caps, interest, barred charges and every amount.

Judgment model

Narrow questions: wear and tear or tenant damage? Noted at move-in?

Coordinator

Schedules vendors so the evidence lands before the deadline.

Manager

Sees each line's basis and accepts the account once.

| A judgment never sets an amount or a date. Unknown facts go to the manager.

WHAT CHANGES FOR THE MANAGER

By about day 10 the manager sees one account, and decides once.

| This is the settlement half, which the pilot delivers.

MARKET

About \$5.7 billion in deposits is settled at US move-outs each year.

46.8M

renter-occupied homes
in the US, Q2 2026

8.6M

renter moves a year

31M

rental units in buildings
of 1 to 49 units

\$5.7B

in deposits settled at
move-out each year

| 83% of renters pay a deposit. The median deposit was \$795 in 2025.

WHY NOW

Move-out rules are tightening, and models can now apply standards like wear and tear.

GPT-4 passed the Uniform Bar Exam in a 2024 study. A narrow model can now apply a standard; code keeps the dates and amounts.

BUSINESS MODEL

Handoff sells a completed move-out, priced per outcome, starting with a paid pilot.

PRICE

Per completed move-out.
Planning range \$250–450,
against \$100–250 for a
software tool.

WHO PAYS

Billed to the owner, or covered
by charges recovered from the
departing tenant.

Not paid from the
manager's margin.

PILOT

One manager, the next 20
move-outs, a \$1,000 fixed fee.

The manager approves every
charge. The manager's own
payment provider moves
the money.

| As each judgment step is measured, more of the service runs as software.

WHY SELL AN OUTCOME

Selling a completed move-out gets a paying customer sooner than selling software.

| Modeled odds, not forecasts. On either path, the likely exit is a sale to a platform.

COMPETITION

Others sell tools for parts of the move-out.
Handoff takes responsibility for both outcomes.

COMPANY	WHAT IT SELLS	WHERE IT RUNS
Obligo	An AI agent for deposit charges, refunds and disputes	Inside the major systems
AppFolio, Entrata	AI maintenance agents and make-ready boards	Their own systems
TurnOps	AI damage documentation for unit turns	Standalone
My AI Front Desk	A move-out assistant from notice to final ledger	Beside the major systems
Vendoroo	AI maintenance coordination with a human expert	Standalone
Handoff	The result: the unit ready and the account settled	With your vendors

TRACTION AND PLAN

The turn runs today. The pilot adds the settlement for New York City units.

| No paying manager yet. The pilot produces the first measured results.

TEAM

Two founders: one builds the product,
one runs the manager relationships.

Owen Wassmer

Product and engineering

Builds the move-out workflow, the settlement engine and the manager's account view.

Connor McPhail

Operators and partnerships

Runs manager walkthroughs, pilots and partner introductions.

We are looking for managers who will show us their recent move-outs.

PROPERTY MANAGERS

Walk us through your recent move-outs.

Run your next 20 through a \$1,000 fixed-fee pilot. You approve every charge.

INVESTORS AND ADVISORS

Introduce us to third-party managers of NYC walk-ups and small multifamily buildings.

Which move-outs in the next two months could we run with you?
