SIGNIFICANT GENERAL PERMITS

Statewide Policies and Significant General Permits: The Policies and Permits Table stores and displays information about on-going planning, policy development, and permitting efforts by the State and Regional Water Boards. The table includes timelines, milestones, and other important information. The Statewide Policies and Significant General Permits report can be accessed at [Policies / Significant General Permits | California State Water Resources Control Board](#)

DIVISION OF WATER RIGHTS

Clear Lake Watershed Co-Management Agreement

The Division of Water Rights joined State Water Resources Control Board (State Water Board) leaders and other tribal, state, and local governments in the Clear Lake Watershed on September 11, 2026, to sign a co-management agreement to restore the Clear Lake watershed. The agreement aims to improve water quality, restore habitat, strengthen native fish populations, and support healthier ecosystems for future generations. State Water Board Executive Director, Eric Oppenheimer, signed the agreement on behalf of the Board.

The Division of Water Rights (Division) has expanded its work in the Clear Lake watershed since it began working on the Clear Lake Hitch emergency in 2022, moving from emergency response to a sustained investment in science, monitoring, enforcement, tribal capacity, and long-term watershed health. The Division has invested over \$1.3 million in direct contracts and monitoring support for a groundwater–surface water study, facilitation and engagement, and water-rights enforcement. Together, these investments are building the scientific foundation and partnerships needed for collaborative management of the Clear Lake watershed.

Through the Clear Lake Hitch Emergency Information Order, the Division collected new information on groundwater pumping and surface water diversions from roughly 1,300 properties, strengthening the basis for understanding water use and its relationship to streamflow near hitch spawning areas. The Division is also investing in the people, partnerships, and monitoring needed to put science to work by supporting facilitation and collaboration, harmful algal bloom and eDNA monitoring, and providing equipment and technical support for Tribal-led stream, groundwater, and water-quality monitoring.

Together, these efforts are creating a shared scientific foundation for decision-making, combining state resources and regulatory tools with tribal knowledge, monitoring, and stewardship to better understand the watershed and identify actions that can make a meaningful difference. This agreement represents the next step in that commitment.

Groundwater Recharge

The Division of Water Rights has two pending recharge temporary permit applications. More information can be found at: [Pending Temporary Permits](#)

Town of Windsor filed a 5-year temporary permit application T033545 on July 31, 2026 to divert up to 200 acre-feet from the Russian River starting in December 2026. On August 27, 2026, the Town requested to delay commencement of diversion until December 2027, because the electrical pump controllers necessary to operate the injection well pumps could not be obtained in time for the 2026 diversion season. T033545 was publicly [noticed](#) on September 4, 2026 with objections due by October 5, 2026.

Yolo County Flood Control and Water Conservation District filed a 180-day temporary permit application T033551 on September 2, 2026 to divert up to 14,999 acre-feet from Cache Creek starting in January 2027. Water rights staff are conducting initial review of the filing and preparing the public notice.

Water Right Petitions

Approved City of Yreka's time extension petition: On September 4, 2026, the Division approved the City of Yreka's petition to extend the development period for water right Permit 15379 (Application 22551), which authorizes municipal, domestic, and industrial diversions from Fall Creek and a tributary to Fall Creek in Siskiyou County. Although the City requested an extension through 2042, the order grants an extension only through December 31, 2036, finding that the City demonstrated due diligence and good cause but has not made sufficient progress toward full beneficial use to warrant an additional 20 years. No protests were received. The amended permit requires annual reports documenting progress toward full development, conservation efforts, growth, infrastructure improvements, and constraints on water use, and updates conditions concerning bypass flows, measuring and monitoring, urban water management, and cannabis cultivation. Staff determined that the extension complies with the California Environmental Quality Act (CEQA) and will not adversely affect public trust resources.

Approved Georgetown Divide PUD Temporary Transfer: On August 25, 2026, the Division approved Georgetown Divide Public Utility District's (GDPUD) temporary transfer of up to 3,250 acre-feet of water stored in Stumpy Meadows Reservoir under Permit 12827 to Westlands Water District for agricultural use. The water will be released from Stumpy Meadows Reservoir, conveyed through Folsom Lake and the Delta, and rediverted at the Jones or Banks Pumping Plants, with reservoir releases ending September 30, 2026. The Division determined that the transferred water would otherwise remain in storage and that, as conditioned, the transfer will not injure other legal users or unreasonably affect fish, wildlife, or other instream beneficial uses. Key conditions require execution of a reservoir refill agreement with the Department of Water Resources (DWR) and the Bureau of Reclamation (Reclamation), coordination of Folsom Reservoir operations and cold-water pool protection with Reclamation, compliance with applicable regulatory and endangered-species requirements, and

reporting of transfer deliveries and subsequent reservoir refill. Prior to approving the temporary transfer, GDPUD informed the Division that surveying for the Foothill Yellow Legged Frog would delay the water release window for the transfer. A condition was added to the order to allow for a revised water release schedule with concurrence from DWR, Reclamation, the California Department of Fish and Wildlife (CDFW), and the United States Forest Service (USFS).

Approved Foresthill PUD Temporary Transfer: On August 26, 2026, the Division approved Foresthill Public Utility District's (FPUD) temporary transfer of up to 2,000 acre-feet of water, plus up to 105 acre-feet to cover conveyance losses (total 2,105 acre-feet), stored in Sugar Pine Reservoir under Permit 15375 to Westlands Water District for agricultural use. The water will be released from Sugar Pine Reservoir between September 14 and October 22, 2026, then conveyed through Folsom Lake and the Delta for redistribution at the Jones and Banks pumping plants or San Luis Reservoir. The Division determined the transferred water would otherwise remain in storage and that, as conditioned, the temporary change will not injure other legal users of water or unreasonably affect fish, wildlife, or other instream beneficial uses. Key conditions require execution of a reservoir refill agreement with DWR and Reclamation, coordination of Folsom Reservoir operations and cold-water pool protection with Reclamation, execution of a Warren Act contract, and reporting of transfer deliveries and subsequent reservoir refill.

Water Rights Enforcement

California American Water Company Monterey Cease and Desist Order – On October 21, 2025, Monterey Peninsula Water Management District (MPWMD) filed an application with the State Board pursuant to Water Code section 1832 to modify Orders WR 2009-0060 and WR 2016-0016. Specifically, MPWMD requests that the State Board issue an amended order that rescinds Condition 2, updates reporting requirements, and includes a trigger that would allow the Division's Deputy Director to reinstate Condition 2, if necessary. This proceeding is currently underway; 159 comment packages were received by the August 19, 2026 due date, and six rebuttal packages were received by the September 18, 2026 due date. A hearing date is scheduled for November 5, 2026. Additional information on this proceeding is available on the Division's [CalAm case website](#).

Hodys – On August 5, 2026, the Division issued an administrative civil liability complaint against Jeremy Hodys and Ryan Shields for alleged water rights and cannabis cultivation violations on properties in the Blue Rock Creek watershed in Mendocino County. The complaint alleges unauthorized surface water diversions, failure to file required diversion statements, violations of the Cannabis Cultivation Policy involving water storage and recordkeeping, and water use for cannabis cultivation without the required state license. The Division proposes \$41,000 in joint and several liability, plus \$29,000 against Mr. Hodys individually and \$11,500 against Shields individually. Mr. Hodys has requested a hearing before the Administrative Hearings Office (AHO), which has been scheduled for November 20, 2026.

Hale – On September 21, 2026, the Division issued an administrative civil liability complaint proposing a \$157,890 penalty against Douglas J. Hale for alleged violations of the Scott River watershed groundwater curtailment order. Division staff documented irrigation on nine days between June 18 and August 12, 2026, while curtailments were in effect and estimated 22.63 acre-feet of water use on those days. The complaint cites continued irrigation after a notice of violation, prior curtailment violations, and potential harm to instream flows and senior water users. The proposed liability is subject to Mr. Hale’s right to request a hearing, which must be submitted by October 12, 2026.

Scott River Notices of Violation – On August 31, 2026, the Division issued **11** NOVs to Local Cooperative Solutions (LCS) participants for failing to submit water use data required by its proposed LCS plan in the Scott River watershed. The notice directs respondents to provide the missing data, up to and including August data, or justify the reporting deficiency by September 10. The NOV also advises that failure to comply with LCS reporting requirements may result in groundwater curtailment and penalties under the June 2026 curtailment order. As of September 23, 2026, **10** respondents have submitted their water use data.

Water Quality Certification, Flow, Data and Administrative Branch

Water Rights Modernization

Updating Water Rights Data for California (UPWARD): Division staff attended the 2026 Water Data Summit in Los Angeles and presented in one of its sessions on the effort to convert the Division’s data from the old databases into CalWATRS, including the challenges of modernizing old data for use in a new system.

CalWATRS also won an award for the best application serving the public at the 2026 Government Technology Summit. Division and Water Board staff were at the summit to receive the award.

Supply & Demand Assessment: The Division of Water Rights continues to develop water supply models, water demand datasets, and water allocation tools for select watersheds across California. These tools, once completed, will provide predictions of surface water supplies and demands to aid state and local water management decisions during periods of water shortage. Recent updates include:

- *Putah Creek.* Staff are working on refinements to the Putah Creek watershed water supply model based on recent and ongoing engagement with commenters.
- *Navarro River.* Meetings were held on September 30th and October 6th to share information about the Navarro River watershed modeling effort, including an overview of the completed water supply model and report, how they work, and how they can be used.
- *Engagement.* During the past month, the staff met with the Russian River Water Sharing Program regarding the Russian River watershed, with Butte County and partner agencies and organizations regarding the Butte Creek watershed, and

with the City of Santa Cruz and partner agencies and organizations regarding the greater San Lorenzo River watershed.

More information on this work is available on the Board's [Supply and Demand Assessment website](https://www.waterboards.ca.gov/sda) (<https://www.waterboards.ca.gov/sda>).

Sites Reservoir Project: The Board issued a water quality certification for the Sites Reservoir Project (Project) on September 10, 2026. The Project, proposed by the Sites Project Authority is a new water surface reservoir that would divert water from the Sacramento River at Red Bluff and Hamilton City, to store up to 1.5 million acre-feet of water. The Project would be located in rural, unincorporated areas of Glenn and Colusa counties. More information, and a copy of the certification, is available on the Board's [Project webpage](#).

Bucks and Grizzly Creek Gravel Augmentation Project: The Board issued a water quality certification for Pacific Gas and Electric Company's (PG&E) Bucks and Grizzly Creek Gravel Augmentation Project (Project) on September 3, 2026. The Project involves the placement of gravel in Bucks and Grizzly Creeks to improve trout spawning habitat. The certification is available on the Division of Water Rights [Water Quality Certification webpage](#).

Lee Vining Hydroelectric Project: On September 16, 2026, State Water Board staff issued a Notice of Preparation (NOP) to begin the CEQA process for the relicensing of Southern California Edison's Lee Vining Hydroelectric Project (Project). The NOP's public comment period ends on October 19, 2026. In addition, on October 13, 2026, staff are hosting two virtual public meetings to present information on the Project and accept public comments. The Project is located approximately five miles northeast of the city of Lee Vining along the eastern base of the Sierra Nevada Mountains in Mono County. Project-related waterbodies include Glacier Creek and Lee Vining Creek. The NOP is available on the Board's Project [webpage](#).

Scott River and Shasta River Watersheds: The Board's 2025 [Emergency Regulation](#) remains in effect under [Assembly Bill 263](#) and curtailments have been reinstated in both watersheds as described below. Additionally, the Division of Water Rights is working on a variety of long-term flow-related items for the Scott River and Shasta River watersheds as directed by Board [Resolution No. 2024-0036](#).

- **Scott River Watershed Curtailments:** On June 9, 2026, Addendum 12 to Orders [WR 2024-0024-DWR](#) and [WR 2026-0005-DWR](#) reinstated curtailments for all surface water rights in the Scott River Watershed. On June 10, 2026, [Order WR- 2026-0008-DWR](#) imposed curtailments and required reporting for groundwater pumping under schedule C of the Scott River Adjudication and overlying groundwater diversions associated with parcels listed in attachment A of the Order. On July 2, 2026, [Addendum 1](#) conditionally suspended curtailments for groundwater rights. On July 4, 2026, the suspension ended because minimum flows dropped below the July minimum flow requirement (50 cfs) at the [USGS Fort Jones gage](#). A large portion of the farming and ranching communities

that irrigate with groundwater in the Scott River Watershed have submitted proposals requesting groundwater local cooperative solutions (LCS) in lieu of curtailment.

- **Shasta River Watershed Curtailments:** Diversions impact the flow of the Shasta River, causing water levels to rise or fall based on amount of water being diverted. Conditional curtailments remain in effect for the Shasta River watershed under [Addendum 6](#) to [Order 2024-0006-DWR](#). Conditional curtailments set additional requirements that must be met before junior water rights can divert, including increased coordination with the State Water Board and/or the Scott River and Shasta River Watermaster District. As of September 15, flows at the [USGS Yreka gage](#) continue to fluctuate around the May 1 - September 15 flow requirement of 50 cfs, with the flow requirement increasing to 75 cfs for September 16-30, and 105 cfs for October. The Division of Water Rights will continue to monitor flows, flow forecasts, precipitation and temperature forecasts, and watershed conditions regularly to determine if adjustments to the curtailments are appropriate.

Additional information on the Emergency Regulation and related flow efforts in the Scott River and Shasta River watersheds is available on the Board's [website](#) for these efforts.

DIVISION OF WATER QUALITY

Groundwater Regulatory Branch

Urban and Industrial Stormwater Infiltration Policy: The Division of Water Quality plans to release the draft Water Quality Control Policy for Urban and Industrial Stormwater Infiltration in late October 2026 for a 45-day public comment period. The draft Policy establishes a risk-based framework for evaluating urban and industrial infiltration projects by considering pollutant types, land use, industrial activities, and drainage area size. It provides clear, peer-reviewed, science-based requirements to ensure projects are designed and implemented to protect groundwater quality and beneficial uses according to their risk level. The draft Policy also identifies conditions where infiltration may be prohibited. During the comment period, staff will hold a public Board workshop to present the draft Policy, answer questions, and gather feedback.

Wastewater Needs Assessment (WWNA) Advisory Group Meeting: As specified in the State Water Board [Resolution No. 2022-0019](#), the State Water Board authorized the Executive Director or designee to enter into contracts to support a statewide effort to conduct an assessment of wastewater needs to improve sanitation access to all Californians and to help achieve the human right to water goals. State Water Board contracted with the University of California, Los Angeles – Luskin Center for Innovation (UCLA, primary investigator contracted), Sacramento State – Office of Water Programs, University of California – Agriculture and Natural Resources, and University of Massachusetts – Amherst (WWNA project team) to provide information on and strategies to address California’s water-related sanitation system needs. The WWNA contract lasts for four years (2023 to 2027) and is conducted in sequential 2-year phases.

The WWNA project team formed an Advisory Group, made up of diverse organizations across California, to advise on project development and draft analyses, inform the WWNA team on wastewater data and information, and to provide other key areas of expertise and perspectives. The Advisory Group began meeting in July 2024 and has since met quarterly. The next quarterly meeting will be held on October 30, 2026, and will provide a high-level overview of progress implementing the Phase 2 Workplan with a focus on the WWNA Solutions & Costs (Phase 2D) and At-Risk Assessment (Phase 2D).

Surface Water Regulatory Branch

Consideration of Amendments to the Seawater Desalination Provisions of the Water Quality Control Plan for Ocean Waters of California: The Division of Water Quality initiated Tribal consultation requests in September 2026 on this amendment project in accordance with Assembly Bill 52’s (AB 52, 2014) Public Resources Code § 21080.3.1, which requires lead agencies to consult with California Native American Tribes that have requested notification of projects under the California Environmental Quality Act (CEQA). Staff expect Tribal consultations may continue into 2027.

Constituent of Emerging Concern (CEC) Strategy Listening Session: Engagement Opportunity: The State Water Board's Constituent of Emerging Concern (CEC) unit will host a CEC Strategy Public Listening Session Late October. This session will provide interested parties and partner agencies with an opportunity to share perspectives that will help shape documents currently in development and inform the strategic direction of the State Water Board's CEC efforts. Feedback gathered will support ongoing program development, cross-agency collaboration, and future CEC considerations as we strengthen our statewide CEC strategy and develop foundational documents that will serve as a resource hub for the Water Boards. Information and materials will be posted on the Water Boards' CEC webpage as they become available: https://www.waterboards.ca.gov/water_issues/programs/cec/index.html

Utility Wildfire General Order: This general order consistent with Senate Bill 901 (Dodd, 2018) will provide a more efficient permitting pathway for electric utility permitting across the state by establishing baseline best management practices for a range of electric utility activities with the potential to discharge waste to waters. The State Water Board will consider adoption on October 20. Additional information and materials are posted on the Water Board's website: https://www.waterboards.ca.gov/water_issues/programs/cwa401/statewide-utility-wildfire-mitigation-general-order.html

Irrigated Lands Regulatory Program Update: The Irrigated Lands Regulatory reports are included in Appendix A of this report.

DIVISION OF FINANCIAL ASSISTANCE

Office of Sustainable Water Solutions (OSWS)

Planning/Construction Project Summary

The tables below summarize the planning and construction agreements and amendments executed in the month of August 2026.

Drinking Water

Drinking Water Funding Agreements Executed (August 2026)						
PWSID	PWS Benefiting	Project Number	Project Recipient	Project Description	Funding Amount	SAFER Status
CA4500023	Hat Creek Highlands Mutual Water Co	4500023-001P	Hat Creek Highlands Mutual Water Company	The funding under this Agreement will be used to prepare a preliminary engineering report (PER), environmental documents, design documents (drawings and technical specifications), and a DWSRF Application for Construction Financing to enable the Recipient to construct water treatment and storage improvements.	\$516,540	At-Risk
CA1510007	Frazier Park PUD	EDWG-1510007-003C	Frazier Park Public Utility District	The funding under this Agreement will be used to construct a new well and replace failing pipelines to resolve insufficient source capacity issues.	\$23,545,844	At-Risk
CA3700938; CA3700934	Pauma Valley Mutual Water Company; Yuima Municipal Water District IDA	EDWG-3701408-001C	Yuima Municipal Water District	The funding under this agreement will be used to consolidate the failing Pauma Valley Water District (PVWC) into the not-at-risk Yuima Municipal Water District (YMWD). Consolidation will address Compliance Order stating the PVWC water system has several regulatory deficiencies.	\$11,658,100	Not-At-Risk; Failing

Drinking Water Funding Agreements Amended (August 2026)						
PWSID	PWS Benefiting	Project Number	Project Recipient	Amendment Type	Amendment Purpose	SAFER Status
CA2410018; CA2400201	Santa Nella County Water District; Volta Community SD	2410018-001C	Santa Nella County Water District	Time Extension	Construction Completion date extension from 12/31/2026 to 12/31/2027.	Potentially-At-Risk; At-Risk
CA3310047	Cabazon Water District	3310047-001P	Cabazon Water District	Time Extension	Work Completion date extension from 9/1/2026 to 9/1/2027.	Potentially-At-Risk
CA5010033	City of Modesto, De Grayson	5010033-001P	Modesto, City of	Time Extension	Work Completion date extension from 6/30/2026 to 12/31/2028.	At-Risk
CA2702317	Mission School WS	EDWG-2702317-001C	Mission Union Elementary School District	Final Budget Approval (FBA)	Project funding increase from \$1,281,273 to \$2,860,888	At-Risk

Wastewater

Wastewater Funding Agreements Executed (August 2026)			
Project Number	Project Recipient	Project Description	Funding Amount
8753-110	City of Wheatland	The funding under this Agreement will be used to construct new wastewater conveyance and pumping facilities needed to reroute the City of Wheatland's wastewater to the Olivehurst Public Utility District (OPUD) wastewater treatment plant for regional treatment.	\$75,000,000
8825-110	City of Rialto	The funding under this Agreement will be used to evaluate, design, and develop documents necessary to connect approximately 221 households in the Shamrock, Maple Misc., Bloomington Ave. North of Randall, South of Randall, and Pomona/Iris communities to the	\$625,000

Wastewater Funding Agreements Executed (August 2026)			
Project Number	Project Recipient	Project Description	Funding Amount
		City of Rialto's sewer collection system and wastewater treatment plant.	

Wastewater Funding Agreements Amended (August 2026)			
Project Number	Project Recipient	Amendment Type	Amendment Purpose
7878-210	City of Woodlake	Time Extension	Final Reimbursement Request date extension from 3/31/2026 to 10/31/2026.
8473-210	Mokelumne Hill Sanitary District	Final Budget Approval (FBA)	Project funding decrease from \$11,740,000 to \$9,565,712 and Completion of Construction date extension from 12/31/2026 to 12/31/2027.

Administrator Summary

Work Plan Type	Work Plan No.	Water System	PWSID	Project Description	TA Provider*	Total Amount Approved	SAFER Status
Amendment	1009-C	Lake Morena Views MWC	CA3700924	Continuation of administrator services to the community	Stantec	\$477,791	Failing
Amendment	D2217033	West Water Company	CA4900893	Continuation of administrator services to the community	Sonoma County	Time Extension Only	Failing

Operation and Maintenance (O&M) Summary

PWSID	PWS Benefiting	Project Number	Project Description	Funding Amount or Increase	Category	SAFER Status
CA1000042	Shaver Springs	D2617002	O&M assistance to provide a rate subsidy to the community for two years.	\$143,425	O&M	Failing
CA5410025	Woodville PUD	D2517007	Agreement was amended to extend the duration of O&M assistance to Woodville PUD to operate their new treatment plant.	Time Extension Only	O&M	Failing

Technical Assistance (TA) Summary

No amended or new Master Agreements were executed during the month of August 2026.

TA Work Plans

DFA is providing Technical Assistance to 341 Drinking Water Systems (203 Failing and 48 At-Risk systems) and to 57 Wastewater Systems. 46% of all Failing systems are receiving TA. The table below summarizes the TA work plans executed in the month of August 2026.

Work Plan Type	Work Plan No.	TA Recipient	PWSID	Project Description	TA Provider*	TA Type**	Total Amount Approved	SAFER Status	Primary MCL Violation***

University Enterprises Incorporated – PFAS Sampling Program

This program provides technical assistance to water systems for collecting and analyzing drinking water well samples for Per- and Polyfluoroalkyl Substances (PFAS) at all wells serving disadvantaged communities and severely disadvantaged communities, as required by State Water Board Order DW 2024-0002-DDW. Sampling and analysis services are provided by University Enterprises Incorporated, Office of Water Programs and their partners at no cost to the water systems. All drinking water wells will be sampled at least once. A second round of sampling will be decided by the State Water Board after the first round of sampling is complete. As of September 3, 2026, 100% of eligible water systems (1,106 of 1,106) are registered to be sampled and 3,361 wells out of the 3,375 scheduled have been sampled.

Loans and Grants Branch (L&G)

Drinking Water State Revolving Fund (DWSRF)

SFY 2026/27 Intended Use Plan (IUP)

The Drinking Water IUP was adopted by the Board on August 18, 2026. It outlines the State Water Board's plan for administering the DWSRF and its associated financing programs for State Fiscal Year 2026–2027.

DWSRF Future Significant Events

8th Drinking Water Infrastructure Need Survey Assessment

Staff are now starting to conduct the 8th Drinking Water Infrastructure Needs Survey and Assessment (DWINSA). The DWINSA estimates the 20-year infrastructure needs of California public water systems eligible for DWSRF assistance. The results are reported to Congress and are used to allocate DWSRF funding for four fiscal years.

Annual Report

Staff are now preparing the SFY 2025/26 Annual Report.

Drinking Water

Clean Water State Revolving Fund (CWSRF)

SFY 2026/27 Intended Use Plan

The Clean Water IUP was adopted by the Board on July 7, 2026. It outlines the State Water Board's plan for administering the CWSRF and its associated financing programs for State Fiscal Year 2026–2027.

CWSRF Future Significant Events

Clean Watershed Needs Survey

US EPA is rolling out a set of CWNS training modules to get everyone ready for the survey kicking off in January 2027. The Clean Watersheds Needs Survey is US EPA's nationwide check-in on what clean water infrastructure upgrades are needed over the next couple decades. It covers everything from wastewater and stormwater to decentralized systems and nonpoint source projects. States gather the data, document future capital needs, and upload it all through US EPA's data entry portal. The final results go to Congress and help shape CWSRF funding allocations for the next four fiscal years.

Annual Report

Staff are now preparing the SFY 2025/26 Annual Report.

Clean Water

**Clean Water Funding Agreements Executed
(August 2026)**

Project Number	Project Recipient	Project Description	Funding Amount
8841-110	Quartz Valley Indian Reservation	This project returns 39,575 acres of timberland to the Quartz Valley Indian Reservation and protects and enhances numerous drinking water and salmon streams.	\$25,000,000
Water Recycling			
8644-110	City of Riverbank	Improvements to Riverbank WWTP to remove nitrogen, produce tertiary recycled water, and recycling of up to 1,800 acre-feet per year on irrigated crops.	\$88,294,420
8768-110	Las Virgenes-Triunfo Public Financing Authority	The project consists of an Advanced Water Purification Facility to treat disinfected tertiary recycled water from the Tapia Water Recycling Facility for California IPR, and convey the purified water to the Las Virgenes Reservoir, where it will be blended with the existing Metropolitan supply in the reservoir.	\$84,240,031

**Clean Water Funding Agreements Amended
(August 2026)**

Project Number	Project Recipient	Amendment Type	Amendment Purpose
8454-110	Sacramento Area Sewer District	Final Budget Approval (FBA)	Construction of Completion Date extension from 12/31/2025 to 12/31/2026.
Water Recycling			
8651-110	Public Utilities Commission of the City and County of San Francisco	Funding Increase	Project funding increase \$115,000,000 to \$125,000,000.

California Financing Coordinating Committee

Planning and Support Unit marketing coordinator and supervisor exhibited at the 2026 WaterReuse California Annual Conference in-person on August 24 through August 26, 2026. Staff presented information about the Division's financial assistance programs, targeting water recycling.

WaterReuse California is the largest state section of the national WaterReuse Association and serves as the leading voice for water recycling in California. The organization provides a primary forum for education, collaboration, and outreach across the state and plays a central role in shaping public policy, regulatory frameworks, and industry best practices for water reuse, supporting California's transition toward resilient, sustainable water supplies.

The conference is designed for individuals, organizations, and agencies involved in or interested in the planning, design, management, operation, and use of water recycling facilities and projects throughout California, including Regulators, Water and Wastewater Agencies, Government Officials, Consulting Engineering Firms, Suppliers, Manufacturers, Environmental Organizations, Advocacy Groups, Academic Institutions, and Water Reuse Industry Professionals.

DIVISION OF DRINKING WATER

Lead and Copper News

On August 19, 2026, the State Water Board adopted emergency regulations for the Lead and Copper Rule Improvements (LCRI) pursuant to Health and Safety Code section 116365.03. As required by Health and Safety Code section 116365.03, the proposed regulation text is not more stringent than, and does not materially alter, the federal LCRI language. The proposed emergency regulations will take effect on November 1, 2027, to align with the LCRI compliance date and ensure coordinated implementation by repealing and replacing existing California Lead and Copper regulations with the proposed LCRI regulations.

The [Notice of Proposed Emergency Rulemaking](#) was posted on September 3, 2026, and the emergency rulemaking package was filed with the Office of Administrative Law in September 2026.

Permits

Permits are issued when a public water system undertakes action that may impact public health (i.e. a new source of supply, modifying treatment or adding a large distribution reservoir), when the original permit has numerous amendments, or following new regulations or conditions that the Division of Drinking Water (DDW) deems necessary for the protection of public health.

The following 77 permits were uploaded between August 4, 2026, and September 13, 2026.

Water System	Permit Type	Permit Purpose
CAL AM - PARKWAY	PERMIT AMENDMENTS	INACTIVATION OF LIPPI PARKWAY WELL
SACRAMENTO SUBURBAN WATER DISTRICT	PERMIT AMENDMENTS	SSWD - INACTIVATE 3 WELLS AND STANDBY 3 WELLS
FOUR WINDS WATER SYSTEM	FULL PERMIT	REVISED GREATER THAN 10-YEAR-OLD PERMIT
SCHWEIKART WATER SYSTEM	FULL PERMIT	REVISED GREATER THAN 10-YEAR-OLD PERMIT
UPLANDS OF THE KERN MUTUAL WATER COMPANY	FULL PERMIT	REVISED GREATER THAN 10-YEAR-OLD PERMIT
CAMPOS BROS. FARMS	FULL PERMIT	REVISED GREATER THAN 10-YEAR-OLD PERMIT
TIPTON COMMUNITY SERVICES DIST	PERMIT AMENDMENTS	REACTIVATE WELL 05 AS ACTIVE

MICHELSSEN PACKAGING	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
MORNING STAR KING, LLC	FULL PERMIT	CHANGE OF OWNERSHIP AND PWS NAME CHANGE
DELANO GROWERS GRAPE PRODUCTS	FULL PERMIT	ADDITION OF GRANULAR ACTIVATED CARBON FOR 1,2,3 - TCP REDUCTION
BUTTONWILLOW RACEWAY PARK CLASSIC	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
STOCKDALE RANCHOS MUTUAL WATER CO	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
CHOCTAW VALLEY MUTUAL WATER CO.	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
RANCHO PAUMA MUTUAL WC	PERMIT AMENDMENTS	AMENDED PERMIT TO BLEND WELL 38 WITH WELLS 39, 42 AND/OR 14R TO LOWER NITRATE
SAN JOSE WATER	PERMIT AMENDMENTS	REMOVE CAMBRIAN RESERVOIRS 1 AND 2
OXXO MINI MART	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
RANCHO DEL REY GOLF CLUB	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
YOSEMITE NPS- ARCH ROCK	FULL PERMIT	UPDATE PERMIT CONDITIONS
MARISCOS LA LANGOSTA WATER SYSTEM	PERMIT AMENDMENTS	REFLECT CHANGE IN LEGAL BUSINESS NAME
CITY OF DOS PALOS	FULL PERMIT	NEW TRIDENT HS SWTP AND APPLICABLE PROVISIONS
YOSEMITE NPS-EL PORTAL	FULL PERMIT	UPDATE PERMIT CONDITIONS
SLIDE INN SNOWBOWL WATER CO	FULL PERMIT	CHANGE OF OWNERSHIP
PENA'S DISPOSAL SERVICES	PERMIT AMENDMENTS	CHANGE RO DESIGNATION TO IX
PETERS FRUIT FARMS, INC	PERMIT AMENDMENTS	POU RO UNITS AT MAIN OFFICE AND LUNCHROOM.
LAKE YOSEMITE COUNTY PARK	FULL PERMIT	ADD WELL 7
YUCAIPA VALLEY WATER DISTRICT	PERMIT AMENDMENTS	INCREASE FILTRATION CAPACITY TO 19.7 MGD WITH TWO MF AND NF TREATMENT TRAINS

BELLFLOWER MUNICIPAL WATER SYSTEM	FULL PERMIT	CHANGE OF OWNERSHIP
MANHATTAN BEACH- CITY, WATER DEPT.	PERMIT AMENDMENTS	WELL 15 PLACED ON STANDBY
LAKEVIEW RANCHOS MUTUAL WATER COMPANY	FULL PERMIT	NEW WELL AND BLENDING FOR ARSENIC AND URANIUM
CALIFORNIA PORTLAND CEMENT	FULL PERMIT	CHANGE Cl2 FROM DRY SODIUM DICHLOORIOISCYUANURATE TO SODIUM HYPOCHLORITE
BAKERSFIELD, CITY OF	FULL PERMIT	WELL 04 INACTIVE TO ACTIVE, ADD GAC. ACTIVATE Cl2 TREATMENT
PINON PINES MWC	FULL PERMIT	ADD STOARAGE TANK
KERN MOBILE ESTATES LLC	FULL PERMIT	CHANGE OF OWNERSHIP
THE PATCH FRUIT STAND	FULL PERMIT	CHANGE OF OWNERSHIP
THE GROVE	FULL PERMIT	NEW WATER SYSTEM
BLOOMINGCAMP WATER SYSTEM	FULL PERMIT	PERMIT REQUIRED EVERY THREE YEARS FOR POU TREATMENT
RUED VINEYARDS	FULL PERMIT	PERMIT REISSUED AS PREVIOUS PERMIT IS OVER 10 YEARS OLD
CSP-HENDY WOODS STATE PARK	FULL PERMIT	REVISED PERMIT TO REFLECT CURRENT OPERATIONS
MISSION HIGHLANDS MUTUAL WATER CO.	FULL PERMIT	REVISED PERMIT TO REFLECT CURRENT OPERATIONS
HAMEL FAMILY WINES	FULL PERMIT	NEW WATER SYSTEM
LAURA CHENEL'S CHEVRE INC.	PERMIT AMENDMENTS	CHANGE FILTRATION MEDIA TO ASM- 10-HP
MOSHIN VINEYARDS	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
CSP-ARMSTRONG REDWOODS STATE RESERVE	FULL PERMIT	REVISED GREATER THAN 10-YEAR- OLD PERMIT
VALLEY OF THE MOON WATER DISTRICT	PERMIT AMENDMENTS	NEW PARK WELL FACILITY
MOUNTAIN VIEW ESTATES MWC	FULL PERMIT	STATE SMALL GREW TO CWS - NEW PERMIT ISSUED
GOLDEN STATE WATER CO - BARSTOW	PERMIT AMENDMENTS	AGATE WELL 05 ACTIVE TO STANDBY

GOLDEN STATE WATER CO - SAN JUAN OAKS	PERMIT AMENDMENTS	EXPANSION OF DISTRIBUTION SYSTEM BY 20%
SANTA CRUZ WATER DEPARTMENT	PERMIT AMENDMENTS	ADD CORROSION CONTROL AT BELTZ AND BELTZ 12 TREATMENT PLANTS, SOQUEL CREEK INTERCONNECTION, AND 4 CORROSION CONTROL MONITORING SAMPLE LOCATIONS
CAMPO GROUP LLC	FULL PERMIT	NEW PUPLIC WATER SYSTEM
EASTERN SIERRA REGIONAL AIRPORT	FULL PERMIT	NEW PUPLIC WATER SYSTEM
SOUTH FEATHER W&P - STRAWBERRY CAMPOUND	PERMIT AMENDMENTS	WELL #2 TO STANDBY STATUS
BLOOMIN BREW	FULL PERMIT	PWS TRANSFER FROM LPA
CALTRANS-TRINIDAD NB	PERMIT AMENDMENTS	TWO NEW WELLS, 10,000-GALLON FINISHED WATER TANK, BOOSTER STATION, AND CI2 TREATMENT
LAGUNA SECA WC	FULL PERMIT	UPDATE PERMIT & ACTIVATE WELL 01
CALVARY CHAPEL JULIAN	FULL PERMIT	FIRST PERMIT ISSUED
BACK COUNTRY INN	FULL PERMIT	PWS TRANSFER FROM LPA
ESCALON, CITY OF	PERMIT AMENDMENTS	ADD WELL NO. 01A
RANCHO CALIFORNIA WATER DISTRICT	PERMIT AMENDMENTS	INACTIVATE WELL 120
SAN JACINTO, CITY OF	PERMIT AMENDMENTS	NEW BATH TREATMENT PLANT
KEYES COMMUNITY SERVICES DIST.	FULL PERMIT	REVISED PERMIT FOR CENTRALIZED GAC AND WELL 9 ARSENIC TREATMENT
SAN BERNARDINO CITY	PERMIT AMENDMENTS	INACTIVATION OF DEVIL CANYON WELL 04
BROOKSIDE MOBILE HOME PARK	FULL PERMIT	NO PREVIOUS PERMIT ISSUED
RANCHO CORTA MADERA	FULL PERMIT	PREVIOUS DOMESTIC WATER SUPPLY PERMIT WAS GREATER THAN 10 YEARS OLD AND NO LONGER REPRESENTATIVE OF THE SYSTEM, SO A REVISED WATER SUPPLY PERMIT WAS ISSUED

YMCA CAMP MARSTON/RAINTREE	FULL PERMIT	NEW PUBLIC WATER SYSTEM
MOJAVE PUD	FULL PERMIT	UPDATED FULL PERMIT
RAINBIRD VALLEY MWC	FULL PERMIT	REVISED GREATER THAN 10-YEAR-OLD PERMIT
RIVERNOOK CAMPGROUND	FULL PERMIT	NEW STORAGE TANK AND WELLS 01 and 03 TO INACTIVE STATUS
CWS-ONYX WATER SYSTEM	FULL PERMIT	NEW STORAGE TANK, WELL 01 TO ACTIVE AND WELL 05 TO INACTIVE STATUS
CWS - KERNVILLE	PERMIT AMENDMENTS	ARDEN WELL STANDBY TO ACTIVE AND COUNTRYWOOD WELL 02 ACTIVE TO STANDBY
CWS - LOWER BODFISH WATER SYSTEM	FULL PERMIT	NEW HIX FILTRATION MEDIA APPROVED
CWS - LAKELAND	FULL PERMIT	ADD STORAGE, NEW WELL 07, AND PFAS TO RO TREATED LIST
SKI WEST VILLAGE WATER SYSTEM	PERMIT AMENDMENTS	WELL 01 TO INACTIVE AND ADD WELL 02 AS ACTIVE
CWS - UPPER BODFISH WATER SYSTEM	FULL PERMIT	NEW HIX FILTRATION MEDIA APPROVED
SWEETWATER AUTHORITY	PERMIT AMENDMENTS	ADD 800,000 GALLON CENTRAL WHEELER TANK AND RESIDUAL CONTROL SYSTEM
GSWC - CLAREMONT	PERMIT AMENDMENTS	INACTIVATION OF BERKELEY WELL 1 AND MARLBORO WELL
LYNWOOD-CITY, WATER DEPT.	PERMIT AMENDMENTS	WELL 11 AND ITS GAC TREATMENT SYSTEM FROM ACTIVE TO INACTIVE
SANTA CLARITA VALLEY WATER AGENCY	PERMIT AMENDMENTS	ADD RESIDUAL MANAGEMENT SYSTEM TO MAINTAIN TOTAL CHLORINE RESIDUAL IN LOWER HERON TANKS 1 AND 2.

Violations & Enforcement Actions

Violations for a water system include whether the system has failed to follow established monitoring and reporting schedules, failed to comply with mandated treatment techniques, violated any Maximum Contaminant Levels, or failed to communicate required information to their customers. Enforcement Actions are used to obtain water system compliance with drinking water requirements to provide a safe and reliable supply of water. The Division of Drinking Water's formal enforcement actions involve the use of statutory authority and includes issuance of citations and compliance orders.

The following enforcement actions were documented from August 15, 2026, and September 14, 2026.

Public Water System	Violation	Contaminant or Rule
AGUANGA MARKET WATER SYSTEM	Reporting	DROUGHT ORDER - FAIL TO RPT DROUGHT INFO
ANZA BAPTIST CHURCH	Reporting	DROUGHT ORDER - FAIL TO RPT DROUGHT INFO

Environmental Laboratory Accreditation Program (ELAP)

ELAP ACCREDITATIONS ISSUED		
	August 8 – September 5	Year-To-Date
New Accreditations	1	9
Renewed Accreditations	17	122
Reciprocity Accreditations	9	40
Amended Accreditations	11	107
Total	38	278

Progress and Performance Unit

ELAP evaluates laboratory performance through proficiency testing to help ensure the reliability of analytical data and compliance with applicable standards. The following proficiency test results were reviewed during the dates identified above.

	August 8 – September 5	Year-to-Date	August PT Denials
Review of Blind Proficiency Tests	3,759	37,609	91

Program Development, Research and Enforcement Unit

ELAP Enforcement received seven new referrals between August 8, 2026, and September 5, 2026, and performed four on-site visits. Five corrective actions were required for laboratories to return to compliance.

Update on Water Quality, Water Rights, Drinking Water and Environmental Laboratory Accreditation Program (ELAP) Fees Stakeholder Process

The proposed FY 2026-27 Drinking Water, ELAP, Water Quality, and Water Rights fee schedule changes were adopted by the State Water Board at the September 15, 2026 board meeting.

OFFICE OF ENFORCEMENT

Enforcement Related Press Releases

Water agencies agree to wastewater upgrades after Russian River spill: Under an [enforcement settlement](#) with the North Coast Water Board, Russian River County Sanitation District and Sonoma Water will improve the Guerneville wastewater system. The settlement was reached following the January 2026 spill of nearly 5 million gallons of untreated and partially treated wastewater into the Russian River. The spill occurred after floodwaters entered the sewer system through unsecured maintenance access points during severe storms, overwhelming the treatment facility and prompting public health advisories for the river and several coastal beaches. The settlement requires the agencies to identify where floodwater is entering the sewer system, secure those access points, and improve storm-preparedness. Initial improvement plans are due this fall, with additional work continuing through October 2027.

Lake Tahoe developer penalized for stormwater violations: The Lahontan Regional Water Board enforcement staff have reached a proposed [\\$156,000 settlement](#) with Alpine View Estates LLC for failing to conduct stormwater inspections and to submit monitoring and reporting for the construction site located at 6731 North Lake Boulevard in Lake Tahoe as required by the Lake Tahoe Construction General Stormwater Permit. The proposed agreement must still be considered by the Board or its executive officer following a public comment period that ended on Sept. 9th.

Other Enforcement Related Updates

Environmental Justice: Office of Enforcement (OE) staff continue to play a pivotal role in advancing environmental justice (EJ) for our disproportionately impacted communities in California. Key activities this quarter include:

- 1) Taking on a new role with the West Oakland Metal Shredder Collaborative Group (West Oakland Collective), serving as a co-agency lead for a subgroup focused on Environmental Health Risk and Racial Equity considerations in enforcement at Radius Recycling (Schnitzer Steel). OE is also participating in the Codifying Best Management Practices subgroup for the West Oakland Collective.

Leading efforts to respond to water-related environmental concerns raised by communities in central California and Los Angeles (for example, those arising from the Identifying Violations Affecting Neighborhoods (IVAN) Environmental Monitoring System), that continue to face disproportionate environmental impacts. OE staff may investigate themselves or identify the appropriate agency, such as a local municipality, to investigate and remedy the issue.

Participation in a joint inspection with the Los Angeles Regional Board at the JCI Jones Chemical facility and later coordinated with State and local agencies to identify immediate and long-term steps needed for the facility to address remaining Fire Code and Health and Safety violations.

Administrative Civil Liability (ACL) Complaints Issued

No ACL complaints were issued in August 2026.

ACL Orders Issued

Region	Discharger/ City	Violation(s) Addressed	ACL Order Amount	Date Issued
3	San Luis Obispo City (SLO)/ San Luis Obispo	Mandatory minimum penalty (MMP) for one exceedance of the average monthly effluent limit (AMEL) for nitrate at the SLO wastewater treatment plant (WWTP)	\$3,000 (MMP – all to Cleanup and Abatement Account (CAA))	8/25/2026
4	Redondo Beach City/ Redondo Beach City	MMPs for the Seaside Lagoon: • 4 exceedances of the AMEL for copper • 2 exceedances of the maximum daily effluent limit (MDEL) for copper • 11 exceedances of the MDEL for enterococcus • 12 exceedances of the MDEL for fecal coliform • 3 exceedances of the MDEL for total coliform • 2 exceedances of the AMEL for total coliform • 5 exceedances of the MDEL for mercury • 6 exceedances of the AMEL for mercury • Exceedance of the MDEL for oil and grease • Exceedance of the instantaneous	\$174,000 (MMP - \$79,500 to the CAA and \$94,500 to a Supplemental Environmental Project (SEP))	8/21/2026

		minimum effluent limit for pH • 2 exceedances of the MDEL for total residual chlorine • Exceedance of the MDEL for selenium • Exceedance of the AMEL for selenium • Exceedance of the AMEL for silver • 3 exceedances of the MDEL for total suspended solids (TSS) • Exceedance of the AMEL for TSS • Exceedance of the AMEL for zinc • Exceedance of the MDEL for zinc		
5S	Auburn City/ Auburn	MMPs for the WWTP: • Exceedance of the average weekly effluent limit (AWEL) for bis(2-ethylhexyl) phthalate • Exceedance of the AMEL for bis(2-ethylhexyl) phthalate	\$3,000 (MMP – all to CAA)	8/7/2026
5S	Lodi City/ Lodi	MMPs for the White Slough Water Pollution Control Facility: • Exceedance of the 7-day median effluent limit for total coliform • Exceedance of the at any time effluent limit for total coliform	\$6,000 (MMP – all to CAA)	8/7/2026
5S	Quartzview Corporation/ Allegheny	MMPs for Sixteen to One Mine: • Exceedance of the MDEL for TSS • Exceedance of the AMEL for TSS	\$81,000 (MMP – all to CAA)	8/8/2026

		• 3 exceedances of the MDEL for antimony • 3 exceedances of the AMEL for antimony • 3 exceedances of the MDEL for arsenic • 3 exceedances of the AMEL for arsenic • 3 exceedances of the MDEL for iron • 3 exceedances of the AMEL for iron • Exceedance of the MDEL for nickel • 3 exceedances of the AMEL for nickel • Late 1st Quarter 2025 self-monitoring report (SMR) submitted 88 days late • Late Report of Waste Discharge (ROWD), submitted 91 days late		
5S	Town of Discovery Bay CSD/ Discovery Bay	MMPs for the WWTP: • Exceedance of the MDEL for total coliform • 7 exceedances of the 7-day median effluent limit for total coliform	\$24,000 (MMP – all to CAA)	8/8/2026
5S	Contra Costa Water District/ Oakley	MMPs for the Segment 5 Contra Costa Canal Replacement Project: • 2 exceedances of the MDEL for manganese • 3 exceedances of the AMEL for manganese	\$15,000 (MMP – all to CAA)	8/8/2026
5S	Sacramento Area Sewer District (SacSewer)/ Elk Grove	MMP for an exceedance of the 1-hour average effluent limit for total residual chlorine at the EchoWater Resource Recovery Facility	\$3,000 (MMP – all to CAA)	8/8/2026

5S	Yuba City/ Yuba City	MMP for an exceedance of the 7-median effluent limit for total coliform for the WWTP	\$3,000 (MMP – all to CAA)	8/8/2026
5S	Ca Dept of Parks & Rec Sacramento/ Grass Valley	MMP for an exceedance of the AMEL for manganese for the Empire Mine State Historic Park	\$3,000 (MMP – all to CAA)	8/8/2026
8	Rialto City/ Bloomington	MMPs for the WWTP: • 6 exceedances of the AMEL for free available cyanide • 2 exceedances of the MDEL for free available cyanide • 5 exceedances of the 12-month flow-weighted running average effluent limit for total dissolved solids (TDS) • 5 exceedances of the 7-median effluent limit for total coliform • Exceedance of the instantaneous maximum effluent limit for total coliform • 23 exceedances of the 24-hour average effluent limit for turbidity • 4 exceedances of the not to exceed the limit more than 5% of the time in any 24-hour period effluent limit for turbidity.	\$138,000 (MMP – all to CAA)	8/27/2026
9	Pierer Immoreal North America,	Failure to timely complete required mitigation for a project to construct a commercial corporate complex at 30125 KTM Way	\$342,424 (all to CAA)	8/7/2026

OFFICE OF INFORMATION MANAGEMENT AND ANALYSIS and the CALIFORNIA WATER QUALITY MONITORING COUNCIL

SWAMP Freshwater and Estuarine Harmful Algal Bloom Program

Labor Day Pre-holiday Assessment and News Advisories

The [SWAMP Freshwater and Estuarine Harmful Algal Bloom \(FHAB\) Program](#) organizes pre-holiday assessments at high recreation sites before major holiday weekends including Memorial Day, Fourth of July, and Labor Day to monitor for harmful algal blooms. The FHAB Program funds most of the laboratory analyses and enlists assistance for the monitoring from Regional Boards, tribes, counties, irrigation districts, homeowners' associations, non-profits, and federal and state partners. The latest pre-holiday assessment monitored 118 sites. Monitoring results trigger public health advisories ranging from no swimming to the highest advisory level of danger advising the public to stay out of and off the water. [News advisories](#) were published to notify the public of the elevated recreational advisory at 6 popular waterbodies since the day-to-day advisory posting is voluntary and not enforced. The monitoring results and all event response to public reports are published to the HAB Reports Map at: [HAB Reports Map | Harmful Algal Blooms \(HABs\)](#).

OFFICE OF RESEARCH, PLANNING, AND PERFORMANCE

Water Storage Investment Program

On September 16, staff presented to the California Water Commission on the current draft version of a possible contract between the State Water Board and the Inland Empire Utility Agency regarding the administration of the Chino Basin Project's water quality public benefit.

Water Conservation

The response rate for the **July 2026** Urban Water Conservation Report is 93% as of the writing of this report (376 reports submitted). The estimated total production (accounting for missing reports) is 194.6 billion gallons (597.2 thousand acre-feet), and the statewide residential use is 99 gallons per capita per day.

The [Save Water](#) site received 328 water waste reports in August.

A Getting to Efficiency public webinar on data management was held on September 22. To register for future webinars and access recordings and resources from the Getting to Efficiency series, visit: [Getting to Efficiency: A Technical Assistance Webinar Series for Making Conservation a California Way of Life](#).

Getting to Efficiency is a State Water Board webinar series done in collaboration with the California Data Collaborative and the California Water Efficiency Partnership that provides information to help urban retail water suppliers address technical and data issues when completing water use efficiency reports.

Staff held virtual office hours on September 1 and 2 for water suppliers pursuing variance and temporary provision requests for the Making Conservation a California Way of Life regulation. Variance and temporary provision requests for the 2025-26 reporting year are due no later than October 1, 2026. Requests are submitted to waterconservation@waterboards.ca.gov. See our [webpage](#) for more information.

Water Board staff attended the 11th annual California Water Data Summit on August 19-20th in Los Angeles, California, as well as the California Water Efficiency Partnership Fall Plenary in Riverside, CA. These convenings of water agencies and data experts had major themes on streamlining water reporting to improve management and reduce administrative burden.

Climate Change

On August 5th, Water Board staff attended the CASA annual conference and provided a high-level overview of potential updates to the Water Boards climate resolution and a related action plan.

International Collaboration

On August 24th, Water Board staff joined a practitioner-to-practitioner exchange between Australian and Californian officials on managing the energy, water, and broader sustainability implications of AI-led data center growth.

OFFICE OF CHIEF COUNSEL

Water Quality Petitions Currently Under Consideration for Review by the State Water Board (as of September 1, 2026)

The State Water Board is considering whether to grant review of the following current active petitions for review of regional water quality control board actions or failures to act in accordance with Water Code section 13320. These petitions for review will be dismissed by operation of law if (1) the State Water Board does not issue a letter granting review or (2) the State Water Board does not receive a written request from the petitioner that the petition be held in abeyance, prior to 5:00 p.m. on the corresponding deadline. Any exhibits identified in the petitions are available upon request by emailing waterqualitypetitions@waterboards.ca.gov.

PETITION NUMBER AND LINK TO PETITION	PETITION INFORMATION	DATE PETITION RECEIVED	DEADLINE FOR STATE WATER BOARD TO GRANT REVIEW
A-2945	Petition of Defensores del Valle Central para el Agua y el Aire Limpio, Environmental Law Foundation, and Clean Water Action for Review of Order No. R5-2026-0032 Approving the Modesto Management Zone Implementation Plan and Amending Waste Discharge Requirements to Incorporate the Nitrate Control Program, Stanislaus County; Issued by the Central Valley Regional Water Quality Control Board	7/2/2026	9/30/2026
A-2946	Petition of Imperial Irrigation District for Review of Notice of Applicability for Coverage Under Order WQ 2022-0048-DWQ, Clean Water Act section 401 Water Quality Certification and Waste Discharge Requirements for Restoration Projects Statewide, Bombay Beach Vegetation Project, Imperial County; Issued by the Colorado River Basin Regional Water Quality Control Board	7/6/2026	10/2/2026

<u>A-2948</u>	Petition of Chiquita Canyon, LLC for Review of Water Code Sections 13267 and 13383 Order No. R4-2026-0156 for Chiquita Canyon Landfill, Los Angeles County; Issued by the Los Angeles Regional Water Quality Control Board	7/13/2026	10/9/2026
<u>A-2940</u>	Petition of Coromar Properties, LLC for Review of Wate Code Section 13267 Order No. R3-2026-0007 for 26 Coromar Drive, Goleta, Santa Barbara County; Issued by the Central Coast Regional Water Quality Control Board	8/6/2026	11/4/2026
<u>A-2951</u>	Petition of Mission Linen Supply for Review of Water Code section 13320 Order No. R3-2008-0027 Revised July 22, 2026 for Former Ambassador Laundry, Santa Barbara County; Issued by the Central Coast Regional Water Quality Control Board	8/19/2026	11/17/2026
<u>A-2953</u>	Petition of Gardena Valley Democratic Club for Review of Waste Discharge Requirements Order No. R4-2026-0226 for Stormwater Discharges Associated with Commercial, Industrial, and Institutional Facilities in the Dominguez Channel - Los Angeles and Long Beach Inner Harbor Watershed and the Los Cerritos Channel - Alamitos Bay Watershed, Los Angeles County, Los Angeles Regional Water Quality Control Board	8/21/2026	11/19/2026

OFFICE OF PUBLIC ENGAGEMENT, EQUITY and TRIBAL AFFAIRS

(Submits Quarterly)

IRRIGATED REGULATORY LAND PROGRAM

Appendix A

September 2026

This month's Irrigated Lands Regulatory Program (ILRP) update provides a summary of significant activities of State Water Board staff for the month of August 2026. This update also covers the Central Valley Regional Water Quality Control Board's (Central Valley Water Board) compliance and outreach activities from July 1, 2026, to September 1, 2026, and the Central Coast Regional Water Quality Control Board's (Central Coast Water Board) semi-annual update on the development of the alternative water supply program. Next month's report will present activities from the North Coast, San Francisco Bay, Central Coast, Los Angeles, Lahontan, Colorado River Basin, Santa Ana, and San Diego Regional Water Boards from August 1, 2026, to September 30, 2026.

State Water Board staff provide monthly updates on significant activities within the program. In August 2026, State Water Board staff participated in a presentation of the Regulatory Alignment Study and continued work to implement recommendations from the Second Statewide Agricultural Expert Panel.

Regulatory Alignment Study:

State Water Board, CalEPA, and California Department of Food and Agriculture's (CDFA) contractor (Crowe LLP) staff partnered to present and discuss recommendations provided in the [Regulatory Alignment Study](#) on August 4, 2026. In November 2022, CDFA contracted with Crowe LLP to evaluate agriculture's food safety and water quality regulatory reporting requirements as part of an effort to streamline the administrative processes and optimize information collected by the state. The study evaluated CDFA's Produce Safety Program and the Water Board's ILRP, Confined Animal Facilities Program, and the Winery Order. The study concluded in 2025, and a [Regulatory Alignment Report](#) was published in June 2026. Crowe LLP presented an overview of the study process and final report. State Water Board staff presented an update on current projects being developed in response to many of the recommendations included in the report, such as creating dashboards for increased data transparency. Staff will continue to collaborate with CDFA to support interagency recommendations.

Second Statewide Agricultural Expert Panel:

State Water Board staff continue reviewing the [Final Expert Panel Recommendations Report](#) (Final Report), which was the result of the Second Statewide Agricultural Expert Panel (Panel), as discussed in [Order WQ 2023-0081](#), *In the Matter of Review of General Waste Discharge Requirements for Discharges from Irrigated Lands Order No. R3-2021-0040* (Central Coast Ag Water Quality Order). More information on the Panel can be found on the [Expert Panel webpage](#).

Staff is coordinating a Workshop to facilitate Regional Boards' input on the Panel recommendations and inform the ILRP improvement process. The Workshop is anticipated to occur in early 2027. Staff encourages the public to sign up for the email list located on the main [Agriculture webpage](#) for ILRP updates, including information on future public meetings and engagement opportunities.

Central Valley Water Board staff provides regular bimonthly updates on compliance and outreach accomplishments and other key activities. The write-up for this month will also serve as the seventh annual update for the implementation of State Water Board [Order WQ 2018-0002](#). The last verbal update was provided to the State Water Board on September 20, 2022, and can be viewed on [YouTube](#).

The following table provides summary information on the Central Valley's ILRP compliance and outreach activities. More information can be found on the Central Valley Water Board's [Executive Officer's Reports website](#). The start date for the first 6 items of the table is July 1, 2026. The end date for all items is September 1, 2026.

Outreach Activity Type	Number
Reminder Letter for Late Report (INMPSR, FE)	1,840
Notice of Violation for Late Report (INMSR, FE)	167
Outreach Letter for Enrollment	384
Water Code Section 13260 Directives	108
Notice of Violation for Failure to Respond to Directive	0
On-Farm Inspection	0
Number of Drinking Water Wells Sampled	14,736
Drinking Water Well Samples	26,749
Drinking Water Well Notifications Required	4,638
Drinking Water Well Notifications Received	4,588
Indicated Only Grower or Family User	2,158
Indicated Replacement Water Provided	1,271
Number of Wells Potentially Needing Replacement Water	1,209

Compliance and outreach activity descriptions:

Reminder Letters for Late Report (INMPSR, FE) – Informal outreach reminding growers to submit late Irrigation Nitrogen Management Plan Summary Report (INMPSR) and/or a Farm Evaluation (FE).

Notice of Violation for Late Report (INMPSR, FE) – Sent to members who did not submit their annual Irrigation Nitrogen Management Plan Summary Report (INMPSR) and/or a Farm Evaluation (FE) by the required deadline. The Notice of Violation informs the grower that failure to submit annual reports may result in an Administrative Civil Liability Order.

Outreach Letter for Enrollment – Sent to owners of parcels who could potentially be irrigating a commercial crop and have not enrolled in the ILRP. Information on the ILRP and its drinking water well monitoring program is provided in the outreach package.

Water Code Section 13260 Directives – Sent to owners of parcels who do not respond to an initial outreach package requesting they enroll in the ILRP or claim an exemption. The directive requires the recipients to enroll with a third-party group within 15 days of receipt of the letter.

Notices of Violation for Failure to Respond to Directive – Sent to owners of parcels who did not respond to the 13260 Directive, informing them that they are in violation of the Directive and failure to respond may result in an Administrative Civil Liability Order.

Number of Drinking Water Wells Sampled – Number of on-farm drinking water wells that have been sampled, required by Order No. WQ-2018-0002.

Drinking Water Well Samples – Number of drinking water well samples collected and reported in GeoTracker.

Drinking Water Well Notifications Required – Number of growers required to notify users and the Central Valley Water Board that their drinking water well samples exceeded the nitrate drinking water standard.

Drinking Water Well Notifications Received – Number of notification responses received from growers whose drinking water well sample results exceeded the nitrate drinking water standard.

Indicated Only Grower or Family User – Number of wells with samples exceeding the nitrate drinking water standard where the grower or grower's immediate family is the only user(s) of the well, precluding the grower from indicating if replacement water was provided.

Indicated Replacement Water Provided – Number of notification responses received indicating replacement water is provided. Note that growers are not required to indicate if replacement water is provided; therefore, this may not accurately reflect the number of people receiving replacement water.

Number of Wells Potentially Needing Replacement Water – Number of wells potentially needing replacement water for users beyond immediate family members. This was calculated by subtracting the combination of "Indicated Only

Grower or Family User” and “Indicated Replacement Water Provided” from the total number of “Notifications Required”.

Groundwater Protection Targets:

In 2018, the State Water Board adopted Order WQ 2018-0002, which required the development of a methodology (Groundwater Protection Formula) to develop township-level estimates of current N loading from agriculture (Groundwater Protection Values) and estimates of the N loading necessary to meet receiving water limitations (Groundwater Protection Targets). On June 30, 2023, the Central Valley Water Board’s Executive Officer conditionally approved Groundwater Protection Targets for 379 townships in the region.

During fall 2025 and spring 2026, Central Valley Water Board staff engaged with State Water Board staff, third-party groups, and environmental justice groups to initiate a scientific peer of the Groundwater Protection Formula, Values, and Targets framework. The resulting feedback package was finalized on May 4, 2026, and will inform updates to the Targets anticipated to be submitted in late 2026 as well as updates to an uncertainty and validation workplan previously submitted by the third-party groups.

Management Practice Evaluation Program:

To facilitate the implementation of improved nitrogen management practices, the ILRP General Orders contain a third-party requirement to develop and implement a Management Practice Evaluation Program (MPEP). The intent of this program is to comprehensively evaluate the protectiveness of various management practices in reducing nitrate leaching across a wide range of crops. The scope of this effort was expanded in response to Order WQ 2018-0002 to also include 1) development of crop-specific coefficients for conversion of yield to nitrogen removed and 2) determination of acceptable ranges for multi-year ratio of nitrogen applied to nitrogen removed (A/R).

On April 3, 2026, Dr. Daniel Geisseler published updates to the report entitled *Nitrogen concentrations in harvested plant parts – Update 04/2026*. This update was completed in collaboration with the Southern San Joaquin Valley Management Practices Evaluation Program, resulting in new or updated estimates for 11 crops. More information can be found on [Dr. Geisseler's webpage](#).

On June 23, 2026, the Central Valley Water Board Executive Officer issued acceptable multi-year A/R ratio target values, referred to as Nitrogen Efficiency Targets. Staff continues to collaborate with State Water Board and stakeholders to evaluate how these and other metrics can be best utilized within the ILRP.

Irrigated Lands Stakeholder Meeting:

Central Valley Water Board staff hold quarterly stakeholder meetings to provide an open forum for communication between staff, third-party groups, environmental justice groups, and other interested parties. Stakeholder meetings were held online via Zoom on December 3, 2025, and August 5, 2026, with focused discussion on updated surface

water quality trigger limits for 10 pesticides and potential program refinements to better align with the CV-SALTS Surveillance and Monitoring Program.

Enrollment Summary:

Staff conducts significant compliance and outreach activities to ensure growers are obtaining appropriate enrollment in the program. The use of Geographic Information Systems (GIS) continues to be a vital tool in this effort. Staff utilizes GIS maps that incorporate the latest Department of Water Resources land use data, current membership lists, WDR land application sites, and past inspection data to identify irrigated lands within the Region. Staff is also working with the Central Valley Water Board's Confined Animal Program to identify irrigated agricultural operations that are covered by their Waste Discharge Requirements. There are fluctuations in irrigated agricultural acreage due to various factors such as, land use conversions, water allocations, retirements, land fallowing, ownership transfers, and regulatory coverage in other programs. Current efforts are helping to provide a clearer picture of commercial irrigated lands in the Region and the status of enrollment in the ILRP. Staff continues to identify and follow up with potential non-filers with the goal of enrolling all commercial irrigated lands in the ILRP. Trends in ILRP enrollment can be found in the [California Water Boards' Annual Performance Report](#).

Domestic Well Monitoring:

All ILRP enrollees are required to monitor drinking water wells on enrolled parcels for nitrate plus nitrite as nitrogen if the wells are used for human consumption.

As of August 25, 2026, approximately 14,736 wells have been sampled with 32 percent of the wells exceeding the nitrate drinking water standard (10 mg/L nitrate as nitrogen), triggering the user notification requirement. Staff has prioritized tracking notification submittals and conducting follow-up, successfully achieving approximately 99 percent compliance.

While the monitoring data are publicly available on GeoTracker, ILRP staff provides assistance as needed to CV-SALTS Nitrate Control Program Management Zones staff to inform their interim drinking water replacement efforts and long-term solutions.

Anonymous Field-level Reporting:

Order WQ 2018-0002 required third-party groups to develop anonymous Member IDs and anonymous APN IDs to be permanently associated with Irrigation and Nitrogen Management Plan (INMP) Summary Report data submitted by growers. This format continues to provide sufficient information for program oversight and progress tracking and has not limited staff's ability to identify and work with individual growers to address reporting and/or performance issues.

Additional program information can be found at the [Central Valley Regional Board ILRP website](#).

Central Coast Water Board's Regional Alternative Water Supply Program Development – Semi Annual Update

On September 20, 2023, the State Water Board adopted [Order WQ 2023-0081](#),¹ *In the Matter of Review of General Waste Discharge Requirements for Discharges from Irrigated Lands Order R3-2021-0040* (Central Coast Ag Water Quality Order). The Central Coast Ag Water Quality Order directs the Central Coast Water Board to develop an alternative water supply program for residents in the Central Coast Region relying on groundwater in areas where the maximum contaminant level (MCL) for nitrate is exceeded as a result of agricultural operations. The Central Coast Ag Water Quality Order also directs the Central Coast Water Board to consider experience gained through other similar programs in the state, to coordinate with representatives of impacted communities, environmental justice organizations, and others in developing the alternative water supply (AWS) program, and to provide a semi-annual update to the State Water Board summarizing progress made to develop this region-wide alternative water supply program.

Since April 2024, the Central Coast Water Board staff has provided semi-annual updates in the Executive Director's Reports. The following actions have been implemented since the completing of the Central Coast Water Board's public workshop on August 21, 2025, which focused on receiving input on conceptual structure for an AWS program in the Central Coast Region for residents relying on groundwater in areas where the MCL for nitrate is exceeded as a result of agricultural operations.

Public Engagement Opportunities:

- On May 26, 2026, the Central Coast Water Board released for public comment and input on the Proposed Order R3-2021-0040-A1, as amended by State Water Board Order WQ 2023-0081 (Proposed Order R3-2021-0040-A1) General Waste Discharge Requirements for Discharges from Irrigated Lands.² Proposed Order R3-2021-0040-A1 amends Order R3-2021-0040 (Ag Order 4.0) and incorporates changes responsive to the State Water Board's remands and directions in Order WQ 2023-0081, including a proposed Drinking Water Solutions Program with regulatory requirements related to the development of an alternative water supply program. Public comments were accepted until July 20, 2026.³
- On June 18, 2026, the Central Coast Water Board held a public workshop to receive public input on Proposed Order R3-2021-0040-A1 at regularly scheduled Board meeting in Goleta.

¹ https://www.waterboards.ca.gov/public_notices/petitions/water_quality/docs/2023/wqo2023-0081.pdf

² Proposed Order R3-2021-0040-A1 and other documents available for public review are available at: https://www.waterboards.ca.gov/centralcoast/board_decisions/tentative_orders/

³ Written public comments received are available at: https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/8823606193/Comments_combined_TOC.pdf

- On August 26, 2026, the Central Coast Water Board held a public workshop with the Agricultural Partners and Environmental Justice Representatives to discuss the proposed Drinking Water Solutions Program included in proposed Order R3-2021-0040-A1. The intent of the meeting was to discuss specific topics, evaluate potential areas of common ground, and identify options that staff should investigate further.

Additional Outreach and Engagement:

- Coordination with the State Water Board Executive Management and Environmental Justice Representatives: On September 22, 2025, and December 10, 2025, Central Coast Water Board staff met with staff from the State Water Board and with members of the Environmental Justice Representatives, an interested party group that has been involved in discussion regarding the development of the AWS program. The intent of the meeting was to explore the possibility of a State Water Board administered AWS program that is similar to how the SAFER fund is administered.
- Coordination with the Central Valley Regional Water Quality Control Board:
 - On September 26, 2025, Central Coast Water Board staff met with staff from the Central Valley Water Board and from the State Water Board executive management to discuss approaches for the provision of replacement drinking water being considered and/or implemented by the Central Valley and Central Coast Water Boards.
 - On January 12, 2026, Central Coast and Central Valley Water Board staff met to discuss draft Order R5-2026-0032, which would approve the Modesto Management Zone Implementation Plan, amend waste discharge requirements to incorporate the nitrate control program, and would memorialize requirements for the provision of replacement drinking water as part of the CV-Salts Program.
- State Water Board Executive Management coordination: On April 27, 2026, Central Coast Water Board staff met with executive management from the State Water Board to notify them of the upcoming public release of draft proposed Order R3-2021-0040-A1 and brief them on the public engagement process.
- Additional Meetings with Interested Party Groups:
 - On September 24, 2025, Central Coast Water Board staff met with the Environmental Justice Representatives to discuss comments they submitted related to the first workshop held on August 21, 2025.
 - On June 28, 2026, staff met with the Agricultural Partners to review their workshop comments and to discuss next steps in developing the AWS program.
 - On March 24, 2026, staff met again with Environmental Justice Representatives to continue collaboration on the development of the AWS program.

- Meetings with the Division of Drinking Water, other State agencies, and other interested parties:
 - On October 21, 2025, Central Coast Water Board staff met with staff from the Division of Drinking Water's (DDW) district offices to discuss considerations for implementing interim and long-term drinking water solutions.
 - On April 23, 2026, Central Coast Water Board staff met with staff from DDW's Resiliency and Data Branch to discuss the Long-term Drinking Water Needs Assessment.
 - On September 26, 2025, Central Coast Water Board staff met with staff from the County of Santa Cruz to discuss implementation of the SAFER funded domestic well testing and point-of-use treatment program.
 - On November 18, 2025, and on April 1 and May 5, 2026, Central Coast Water Board staff met with staff from the California Department of Food and Agriculture's Fertilizer Research and Education Program to discuss proposed Order R3-2021-0041-A1 and opportunities for nutrient management training

IRRIGATED REGULATORY LAND PROGRAM

CANNIBIS CULTIVATION PROGRAM

Appendix B

October 2026

This Water Boards' Cannabis Cultivation Program (Cannabis Cultivation Program or Program) update provides a summary of significant actions and achievements accomplished by the State Water Board's Division of Water Quality, Division of Water Rights, Office of Enforcement, and nine Regional Water Board staff (collectively referred to as the Water Boards) since the April 2026 Executive Director's Report. Additional information on the Cannabis Cultivation Program, including the [Cannabis Cultivation Policy – Principles and Guidelines for Cannabis Cultivation](#) (Cannabis Policy), [General Waste Discharge Requirements and Waiver of Waste Discharge Requirements for Discharges of Waste Associated with Cannabis Cultivation Activities](#) (Cannabis Cultivation General Order), Cannabis Small Irrigation Use Registration (SIUR), and enforcement efforts, is available on the [Water Board's Cannabis Cultivation Program webpage](#).

WATER BOARDS' CANNABIS CULTIVATION PROGRAM:

The Cannabis Program's regulatory functions continue to be diminished due to persistent non-payment of fees by an ongoing portion of regulated entities. This ongoing revenue shortfall has constrained resources and limited the Program's ability to maintain a balanced approach between enforcement and compliance assistance. As a result, while enforcement capabilities are improving, the Program faces continued challenges in sustaining comprehensive regulatory oversight. Annual fees directly fund regulatory staffing resources. To help address this issue, annually staff do outreach to the delinquent fee payers notifying them of the issue and that their Cannabis General Order enrollment will be terminated if the fees remain unpaid which also consequently jeopardizes their Department of Cannabis Control license. Despite these efforts hundreds of terminations occur every year.

The Water Boards set program fees annually. For FY 2027–28, staff proposed a flat 28% fee increase for enrollment in the Cannabis General Order. This increase is necessary to support the current staffing levels of 10 regulatory positions state-wide. Although the Program was authorized for 31 fee-funded positions, only 10 positions are currently filled due to the ongoing shortfall in fee revenue. The fee increase is intended to only cover the cost of those 10 filled positions.

Given both the instability in the legal cannabis market and other regulatory costs being imposed on this transitioning industry, the Program has been hesitant to propose adjustments to its fee structure in recent years. This has resulted in the Program's fees remaining relatively low with only small fee increases compared to other Water Board agricultural programs. Stagnant fees combined with a much lower collection rate compared to other comparable programs resulted in a need to raise fees to maintain minimal staffing for administering this critical program.

In addition to the fee increase, staff are also working to improve enrollment accuracy to ensure growers are in the correct General Order tier and paying fees that are most representative of the staff time needed to regulate their specific site. Future stakeholder meetings will be held to solicit feedback on tier structure and program funding issues.

Table 1 below shows the Regional Water Boards' 2026 metric goals and Table 2 shows the Division of Water Quality, Division of Water Rights, and the Office of Enforcement's 2026 metric goals, as well as the Program totals for the current reporting period.

Enrollment

The Division of Water Quality processes all applications for enrollment statewide under the Cannabis Cultivation General Order and enrolled 129 applicants between January 1, 2026, and July 31, 2026. This level of new enrollment has been generally consistent for the last four consecutive years. The total number of active Cannabis Cultivation General Order enrollments is currently around 4,000- a reduction of around 400 enrollments from last year. Additionally, we anticipate around 500 additional terminations to be issued in December due to lack of payment over multiple years, further reducing the revenue supporting Program regulatory staff. Between January 1, 2026, and July 31, 2026, the Division of Water Rights issued two SIUR enrollments, bringing the total registered SIURs to about 530.

Enforcement

The Program continues to focus on enforcement of unregulated cannabis cultivation sites which often have egregious water quality threats and unauthorized water diversions. Program enforcement staff accompany law enforcement from partner agencies on search warrant inspections and document evidence of environmental harm resulting from non-compliance with regulatory protections. Staff use this evidence to support criminal enforcement as well as administrative enforcement to facilitate cleanup and remediation of environmental harm, encourage enrollment in our regulatory programs when possible, and to deter illegal cultivation and the adverse water quality impacts associated with that activity.

This year, enforcement staff has supported 146 search warrant inspections at illegal cultivation sites and issued 15 formal administrative enforcement actions.

The Division of Water Rights, Cannabis Enforcement Section (CES) has been coordinating with the Department of Cannabis Control (DCC) to identify licensed cannabis cultivators that divert surface water without an appropriative water right - such as a Cannabis Small Irrigation Use Registration (SIUR) - and/or failed to report their diversion and use of water. CES identified 147 priority properties that appeared to be diverting water for cultivation without a water right.

To identify these properties, CES relied on multiple information sources, including, Statements of Water Diversion and Use that reported cannabis irrigation; Department of Fish and Wildlife's Lake and Stream Alteration Agreements indicating diversion or reservoirs used for cultivation; DCC licensing data; SIUR revocations; complaints; CES

field inspection data; partner agency Notices of Violation; former water rights filings claiming fully contained springs; and aerial images.

DCC issued Notice to Comply (NTC) letters to all 147 licensed cultivators during August 2025 and required each licensee to contact CES to identify and confirm their water source(s). CES completed 74 site investigations in May 2026 for those that responded to the NTC letter. CES identified approximately 40 of the 74 investigated sites as requiring further infield follow-up. CES has conducted seven joint field inspections with DCC in 2026 of the approximate 40 that required additional follow-up. Approximately 33 of the 74 CES investigated sites came into compliance after contact with CES. DCC and CES continue to coordinate outreach and potential DCC enforcement on the 73 licensees who did not respond to the NTC, including one licensee that acknowledged diverting water for cannabis cultivation but refused to obtain a water right.

Outreach

Remote outreach events continue to be popular with both regulatory agencies and stakeholders. Local in-person meetings are also occurring, and attendance at those events is on the rise. A couple of noteworthy examples include North Coast Water Board staff participation on the Cultivating Equity Panel at the 3rd annual Cal Poly Humboldt Cannabis & Environmental Stewardship Symposium and multiple Central Valley Water Board outreach events addressing various topics including how to enroll, understanding the Cannabis Policy requirements, site development, road design, and indoor cultivation. Table 3 lists the significant public outreach events hosted or attended by Program staff during the reporting period.

Conclusion

As shown in the tables below, the program is doing well overall in meeting its goals. The current cultivation season is still underway, and the final numbers will be available in the next program report in April 2027.

Table 1 – Cannabis Cultivation Metrics Reported for Regional Water Boards (January 1, 2026 – July 31, 2026)

		Region 1		Region 2		Region 3		Regions 4,8,9		Region 5		Regions 6,7	
Measure		Current	Goal	Current	Goal	Current	Goal	Current	Goal	Current	Goal	Current	Goal
Illegal Sites	Directive to Enroll ¹	9	0	0	0	0	0	0	0	0	30	0	0
	Enforcement ²	6	15	0	0	0	1	1	1	1	4	0	1
	Inspections ³	31	50	4	2	4	3	19	30	28	40	0	6
Inspection Reports	Issued > 30 Days	11	-	1	-	1	-	5	-	5	-	0	-
	Issued ≤ 30 Days	7	40	5	2	1	3	18	30	21	40	3	6
New Enrollments ⁴		40	0	27	10	12	10	25	15	11	25	14	15
Outreach Events ⁵		3	4	0	0	0	0	1	3	7	10	0	0

¹ Directive to Enroll: Water Code section 13260 Letters

² Enforcement: Administrative Civil Liability, Cleanup and Abatement Orders, Time Schedule Orders, or Cease and Desist Orders issued to unregulated cultivation sites

³ Inspections: Performed on unregulated cultivation sites

⁴ New Enrollments: Cannabis Cultivation General Order 2023-0102-DWQ (Water Quality)

⁵ Events attended or hosted by program staff to train and inform other agency staff and/or the public on cannabis related information including but not limited to the Cannabis Policy, Cannabis Cultivation General Order, and Cannabis SIUR

Table 2 – Cannabis Cultivation Metrics Reported for State Water Board (January 1, 2026 – July 31, 2026)

		Division of Water Quality		Division of Water Rights		Office of Enforcement		Program Summary (Tables 1&2)	
Measure		Current	Goal	Current	Goal	Current	Goal	Current Total	Goals Total
Illegal Sites	Directive to Enroll ¹	-	-	60	50	0	0	69	80
	Enforcement ²	-	-	7	10	0	3	15	35
	Inspections ³	-	-	30	70	30	96	146	297

Outreach Events ⁵		0	2	1	3	0	1	12	23

¹ Directive to Enroll: Water Code section 13260 Letters (Water Quality) and Notices of Violation (Water Rights)

² Enforcement: Cleanup and Abatement Orders (Water Quality), Cease and Desist Orders, Time Schedule Orders, or Administrative Civil Liability issued to unregulated cultivation sites

³ Inspections: Performed on unregulated cultivation sites

⁴ New Enrollments: Small Irrigation Use Registrations (Water Rights)

⁵ Events attended or hosted by program staff to train and inform other agency staff and/or the public on cannabis related information including but not limited to the Cannabis Policy, Cannabis Cultivation General Order, and Cannabis SIUR

Table 3 - COORDINATED PUBLIC OUTREACH – CANNABIS CULTIVATION PROGRAM¹ (January 1, 2026 – July 31, 2026)

Date and Location	Event Details	Participating Agencies
Thursday, June 25, 2026 Virtual	Road Design	Central Valley Water Board
Thursday, May 21, 2026 Virtual	Termination and Change of Information	Central Coast Water Board
Thursday, April 23, 2026 Virtual	Cannabis Cultivation Policy	Central Valley Water Board
Thursday, April 17, 2026 Arcata	2026 Cannabis and Environmental Stewardship Symposium – Cultivating Equity Panel Discussion: Diverse Perspectives on Environmental Stewardship Estimated Attendance: 100	North Coast Water Board, California Department of Fish and Wildlife (CDFW)
Thursday, March 19, 2026 Virtual	Site Development	Central Valley Water Board
Wednesday, March 18, 2026 Forestville	Cannabis Outreach Event: Sonoma County Department of Agriculture Estimated Attendance: 100	Division of Water Rights
Thursday, February 19, 2026 Virtual	Indoor Cultivation	Central Valley Water Board
Wednesday, February 11, 2026 Riverside	California Water Environment Association - P3S 2026 Conference	South Coast Regional Cannabis Unit
Thursday, January 22, 2026 Virtual	Annual Monitoring	Central Valley Water Board
Thursday, January 15, 2026 Virtual	Nevada County Cannabis Alliance Panel	Central Valley Water Board, CDFW, Department of Cannabis Control

This table represents public outreach. Staff from the Regional Water Boards, Division of Water Rights, Division of Water Quality, and Office of Enforcement coordinate closely throughout the state with the California Department of Fish and Wildlife, Department of Cannabis Control, and counties on enforcement efforts but these ongoing coordination efforts are not included as Program metrics and therefore not included in this tab
